Profile:

My name is Shannen Collins. I am a web developer and graphic designer in search of a position where I can expand my skills and put my current knowledge to good use. I have completed my Bachelor of Creative Media degree, which involved several community projects, and I previously worked at Harvey Norman as a PhotoCentre Operator. I have returned to study, this time with the Diploma of IT Tech Support to learn more about web, programming and IT in general.

Education:

Diploma of IT Tech Support, UCOL, Palmerston North

2024 - 2025 (In Progress)

Bachelor of Creative Media, UCOL, Palmerston North

2019 - 2021 (Completed)

Experience:

PhotoCentre Operator, Harvey Norman, Palmerston North

2022 - 2025

As the PhotoCentre Operator, I worked in a fast-paced environment, where I not only managed the printer, but also assisted customers with using the kiosks, did regular cashier duties, problem solved any technical issues that arose and provided more time consuming services like scanning, canvases, posters and photo restoration using Adobe Photoshop.

Industry Immersion, Bachelor of Creative Media, UCOL, Palmerston North

2020 - 2021

For my Bachelor of Creative Media qualification, I did a year and a half of industry projects for the community. This included making informative posters for the Manawātū Community Law Centre, designing posters and doing video editing for the Palmerston North City Council and creating unique designs for a cultural wedding that represented the main couple.
